

Description and Instructions for Using

BRLNT ORGANIC O-10 Fertilizer:

BRLNT ORGANIC O-10 is an Organic-Mineral fertilizer, a unique blend of nutrients that provides essential elements for healthy growth and development of your plants. Our fertilizer is based on BRLNT ORGANIC technology, where carefully selected mineral and organic components work together to enhance the absorption of beneficial elements by the plants.

BRLNT ORGANIC O-10 is a rich source of microelements such as manganese (Mn), copper (Cu), zinc (Zn), iron (Fe), and macroelements including nitrogen (N), phosphorus (P), and potassium (K). All of these elements are essential for healthy plant growth and abundant yields.

In the composition of **BRLNT ORGANIC O-10**, you will also find a specially developed and enriched mixture of micro and macro elements, along with humic acids, derived from brown coal extract. This unique formula, developed by the BRLNT ORGANIC scientific team, enhances the effectiveness of the fertilizer.

BRLNT ORGANIC O-10 places emphasis on mineral elements that are crucial for plant development and maintaining balance in plants. However, thanks to BRLNT ORGANIC technology, these mineral components are complemented by organic ingredients, making the mineral part even more effective.

It's important to note that **BRLNT ORGANIC O-10** works harmoniously with other BRLNT ORGANIC fertilizers, which focus on organic components. Together, they create a comprehensive fertilization strategy that provides the best conditions for plant development.

Choose **BRLNT ORGANIC O-10** to provide your plants with a comprehensive and balanced mineral diet, allowing them to reach their full potential in growth and development.

Main Features and Benefits of BRLNT ORGANIC O-10:

BRLNT ORGANIC O-10 fertilizer offers several key features and benefits that translate into healthy plant growth and abundant yields. Here are the most important ones:

1. **Comprehensive Plant Nutrition:** BRLNT ORGANIC O-10 provides plants with both microelements like manganese, copper, zinc, iron, and macroelements such as nitrogen, phosphorus, and potassium. It offers a complete source of nutrients for your plants.
2. **Mineral Components:** This fertilizer places an emphasis on mineral elements essential for plant health and growth. BRLNT ORGANIC O-10 ensures that your plants have access to critical nutrients that support their life functions.
3. **BRLNT ORGANIC Technology:** BRLNT ORGANIC O-10 is based on a specially developed BRLNT ORGANIC technology that combines mineral elements with organic substances. This combination enhances the fertilizer's effectiveness and accelerates the absorption of nutrients by the plants.
4. **Growth and Development:** Regular application of BRLNT ORGANIC O-10 promotes healthy plant growth and development. Plants become more resilient to various stressors, greener, and produce abundant blooms.
5. **Synergy with Other BRLNT ORGANIC Fertilizers:** This fertilizer works exceptionally well with other BRLNT ORGANIC products that focus on organic components. Together, they create a comprehensive fertilization strategy that provides optimal conditions for plant growth.
6. **Abundant Yields:** BRLNT ORGANIC O-10 contributes to abundant yields and increased plant productivity through balanced and comprehensive fertilization.
7. **Environmental Stress Resistance:** The components of BRLNT ORGANIC O-10 help plants build resistance against environmental stressors such as drought and low temperatures.
8. **Easy Application:** This fertilizer is easy to use and can be applied in gardens, orchards, and agricultural fields.

BRLNT ORGANIC O-10 is an ideal choice for those who want to provide their plants with a comprehensive and balanced mineral diet, resulting in healthy growth and abundant yields. Thanks to BRLNT ORGANIC technology, your plants can achieve their full growth and development potential.

How to Apply BROLLNT ORGANIC O-10 Fertilizer:

General Steps:

1. Prepare the appropriate amount of BROLLNT ORGANIC O-10 fertilizer. As per the instructions, it is recommended to use 10 liters of fertilizer per hectare.
2. Dilute the BROLLNT ORGANIC O-10 fertilizer with water. For each hectare, we recommend diluting 10 liters of BROLLNT ORGANIC O-10 fertilizer in 200-300 liters of water. You can adjust the amount of fertilizer and water according to the specific needs of your cultivation area.
3. Use the appropriate tools for applying the fertilizer, such as a sprayer, to evenly distribute the mixture on the cultivation surface.

Dosage:

4. BROLLNT ORGANIC O-10 fertilizer is recommended to be applied twice during the plant's growth period. You can adjust the fertilization schedule based on the specific plant and growing conditions.
5. Perform the first application at the appropriate time during the plant's growth phase and subsequent applications as per the manufacturer's recommendations or based on the plant's needs.

Optional:

6. If you have additional fertilizer needs, you can add other fertilizers to the mixture at the same time or apply them separately, following the manufacturer's recommendations.

Ensure that you follow the instructions and guidelines for using BROLLNT ORGANIC fertilizers, as well as any local regulations related to fertilization and plant protection, to achieve the best results and protect the environment.

Specific Application Recommendations:

Detailed recommendations for applying BROLLNT ORGANIC O-10 fertilizer to specific crops are available upon customer request. Since different plant species and growing conditions may require individualized fertilization approaches, we

recommend consulting with the manufacturer or a fertilization specialist to obtain personalized recommendations.

Additional Information:

- Spraying should be carried out when the air temperature is between +5°C and +25°C.
- Foliar treatments should be done in dry weather and without strong winds. Optimal times for application are in the morning and evening.
- BROLLNT ORGANIC O-10 can be used either alone or in combination with mineral fertilizers. Combining them often leads to increased crop yield.
- Do not exceed the recommended doses.
- Unused BROLLNT ORGANIC O-10 fertilizer should be properly disposed of after its expiration date.
- The shelf life of the product is 1 year.

Safety Precautions:

- When working with the fertilizer, follow general hygiene and safety guidelines.
- Use protective gloves.
- In case of eye contact, rinse thoroughly with water and consult a doctor if necessary.
- The product is not for consumption, keep it out of reach of children.
- Transportation: No restrictions, the product is safe.
